Allowable Subject Matter

1. Claims **1-10** are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is Tsukuda, U.S. Patent No. 6,085,170, and Kindell, U.S. Patent No. 5,979,750.

Tsukuda discloses a delivery managing system which schedules and manages the delivery of the goods. Tsukuda also discloses the information inputted (bar-code) from the input apparatus is registered into the commissioned goods information and locker information, thereby to notice the arrival to the distribution server and the client relating thereto. Further, Tsukuda discloses a step of checking whether there is the goods inside of the key-locked box or not. For the checking, the box observation device such as an infrared light sensor, etc. is used.

Kindell discloses a computerized delivery-acceptance system that has a delivery container with computer-control input door and outlet door. The input door has a lock that can be unlocked by computer-controlled recognition of access authorization for placing delivery items in the delivery container.

As per claim 1, the closest prior art of record taken either individually or in combination with other prior art of record fails to teach or suggest a system using a scanner positioned within the secure receptacle, automatically registering the placement of the parcel within the secure receptacle after the securing step by scanning a label on the parcel to obtain the placement data in response to the receptacle being secured and communicating the placement data comprising at least a portion of the delivery instructions from the scanned label on the parcel over a communication link. Claims 2-9 depend from claim 1 and are therefore allowable.
